Dodge & Cox Talent Acquisition Team
San Francisco

Dear Dodge & Cox Hiring Manager,

I am excited to apply for the Credit Trader position at Dodge & Cox. With more than five years of experience in fixed income, credit trading and portfolio management in both Emerging and Developed markets fixed income securities and credit derivatives trading I am confident that I have the skills and experience necessary to excel in this role.

At previous companies, I was responsible for managing a spot and derivatives portfolio and consistently exceeded PnL goals year over year. I also played a key role in the ALM department to improve portfolios allocation and hedging.

In addition to my experience in market making and portfolio management, I have extensive experience in programming and have developed pricing and trading tools as well as desk infrastructure. I developed and used numerous pricing tools for XVA modelling (CVA in particular) which allowed for quick and accurate pricing of complex derivatives structures. I also managed to automate various trading tasks, such as order entry and risk management.

I am confident that my experience and skills make me an excellent candidate for the Credit Trader position at Dodge & Cox. Thank you for considering my application, I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Arkadiy Klyukin
